State Medicaid programs can pay Medicare premiums for certain dual eligibles (i.e., for beneficiaries also enrolled in a state Medicaid program); this action is called “buying in” and so this variable is the “buy-in code.” Any month where the BUYINXX variable was: A (Part A state buy-in), B (Part B state buy-in), or C (Part A and Part B state buy-in) is counted.

**LABEL:** Monthly cost sharing group under Part D low-income subsidy - January

**DESCRIPTION:** This variable indicates the beneficiary’s Part D low-income subsidy cost sharing group for a given month (January). The Part D benefit requires enrollees to pay both premiums and cost-sharing, but the program also has a low-income subsidy (LIS) that covers some or all of those costs for certain low-income individuals, including deductibles and cost-sharing during the coverage gap.

13 = Beneficiary enrolled in Parts A and/or B, but not Part D enrolled. It is unknown whether the beneficiary has creditable prescription drug coverage elsewhere.

Null/missing = Beneficiary was not found in cost sharing group data

**COMMENT:** CMS identifies beneficiaries with fully-subsidized Part D coverage by looking for individuals that have a 01, 02, or 03 for the month. Other beneficiaries who are eligible for the LIS but do not receive a full subsidy have a 04, 05, 06, 07, or 08. The remaining values indicate that the individual is not eligible for subsidized Part D coverage. There are 12 monthly variables - where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

There is a late enrollment penalty for those who are eligible for Part D but choose not to enroll for any given year and do not have creditable coverage for that time. A number of Medicare-eligible beneficiaries may have access to other types of prescription drug plans. Creditable prescription drug coverage includes, but is not limited to: employer-based prescription drug coverage, including the Federal Employees Health Benefits Program (FEHB); qualified State Pharmaceutical Assistance Programs (SPAPs); military-related coverage (e.g., VA, TRICARE); and certain Medicare supplemental (Medigap) policies. For additional details regarding the creditable coverage provision of the Part D benefit, please refer to the CMS website at: [http://www.cms.gov/Medicare/Prescription-Drug-Coverage/CreditableCoverage/index.html?redirect=/CreditableCoverage/](http://www.cms.gov/Medicare/Prescription-Drug-Coverage/CreditableCoverage/index.html?redirect=/CreditableCoverage/).

**COMMENT:** CMS identifies beneficiaries with fully-subsidized Part D coverage by looking for individuals that have a 01, 02, or 03 for the month. Other beneficiaries who are eligible for the LIS but do not receive a full subsidy have a 04, 05, 06, 07, or 08. The remaining values indicate that the individual is not eligible for subsidized Part D coverage. There are 12 monthly variables - where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

There is a late enrollment penalty for those who are eligible for Part D but choose not to enroll for any given year and do not have creditable coverage for that time. A number of Medicare-eligible beneficiaries may have access to other types of prescription drug plans. Creditable prescription drug coverage includes, but is not limited to: employer-based prescription drug coverage, including the Federal Employees Health Benefits Program (FEHB); qualified State Pharmaceutical Assistance Programs (SPAPs); military-related coverage (e.g., VA, TRICARE); and certain Medicare supplemental (Medigap) policies. **COMMENT:** The original source for this variable is the State Medicare Modernization Act (MMA) files that states submit to CMS. Those files are considered the “gold standard” for identifying dual eligibles because the information in them is used to determine the level of Medicare Part D low-income subsidies. Dual eligibles are often divided into “full duals” and “partial duals” based on the level of Medicaid benefits they receive. CMS generally considers beneficiaries to be full duals if they have values of 02, 04, or 08, and to be partial duals if they have values of 01, 03, 05, or 06. Partial duals sometimes divided into the QMB-only population (01) and all other partial duals (03, 05, or 06). There are different ways to classify dually eligible beneficiaries. Additional information regarding various ways to identify dually enrolled populations, refer to a CCW Technical Guidance document entitled: "Options in Determining Dual Eligibles". COMMENT: The original source for this variable is the State Medicare Modernization Act (MMA) files that states submit to CMS. Those files are considered the “gold standard” for identifying dual eligibles because the information in them is used to determine the level of Medicare Part D low-income subsidies. Dual eligibles are often divided into “full duals” and “partial duals” based on the level of Medicaid benefits they receive. CMS generally considers beneficiaries to be full duals if they have values of 02, 04, or 08, and to be partial duals if they have values of 01, 03, 05, or 06. Partial duals sometimes divided into the QMB-only population (01) and all other partial duals (03, 05, or 06). There are different ways to classify dually eligible beneficiaries. Additional information regarding
various ways to identify dually enrolled populations, refer to a CCW Technical Guidance
document entitled: "Options in Determining Dual Eligibles". There are 12 monthly
variables - where the 01 through 12 at the end of the variable name correspond with
the month (e.g., 01 is January and 12 is December).

**DESCRIPTION:** This variable is the number of months during the year that the beneficiary was dually eligible (i.e., he/she was also eligible for Medicaid benefits).  

**SHORT NAME:** DUAL_MO  

**LONG NAME:** DUAL_ELGBL_MONS  

**TYPE:** NUM  

**LENGTH:** 3  

**SOURCE:** CMS Common Medicare Environment (CME) (derived)  

**VALUES:** 0-12  

**COMMENT:** CCW derived this variable by counting the number of months where the beneficiary had dual eligibility (i.e., months where DUAL_STUS_CD_XX equal to '01', '02', '03', '04', '05', '06', '08', '09', or '99'). There are different ways to classify dually eligible beneficiaries - in terms of whether he/she is enrolled in full or partial benefits. Additional information regarding various ways to identify dually enrolled populations, refer to a CCW Technical Guidance document entitled: "Options in Determining Dual Eligibles"
**EFIVEPCT**

**LABEL:** Enhanced Medicare 5% Sample Indicator

**DESCRIPTION:** This variable indicates whether the beneficiary was ever included in the CCW 5% sample for any year (1999+).

**SHORT NAME:** EFIVEPCT

**LONG NAME:** ENHANCED_FIVE_PERCENT_FLAG

**TYPE:** CHAR

**LENGTH:** 1

**SOURCE:** CCW (derived)

**VALUES:**
- Y = Yes, included in enhanced 5% sample
- Null = Not included in enhanced 5% sample

**COMMENT:**
This enhanced 5% sample is broader than the annual 5% sample (variable that was previously called FIVE_PERCENT_FLAG; currently called SAMPLE_GROUP - when value = '01' or '04') because it includes all beneficiaries who were ever part of the 5% sample but had a HIC change that was not part of the sample. The "enhanced" indicator variable allows for longitudinal study of the 5% sample (i.e., once in, always in).

CCW creates the 5% sample using standard CMS processes. The 5% random sample consists of people who had a Medicare beneficiary Health Insurance Claim number (HIC) equal to the Claim Account Number (CAN) plus Beneficiary Identity Code (BIC) (HIC=CAN+BIC) where the last two digits of the CAN are in the set {05, 20, 45, 70, 95}.
ENRL_SRC

LABEL: Enrollment Source

DESCRIPTION: This variable indicates the source of enrollment data.

SHORT NAME: ENRL_SRC

LONG NAME: ENRL_SRC

TYPE: CHAR

LENGTH: 3

SOURCE: CCW

VALUES: EDB = Enrollment Database
        CME = Common Medicare Environment

COMMENT: The Centers for Medicare & Medicaid Services (CMS) has updated the Medicare enrollment source data for the Master Beneficiary Summary File (MBSF). As of March 2017, the MBSF includes Medicare enrollment information from the CMS Common Medicare Environment (CME) rather than the CMS Common Medicare Environment (CME). Data from the two sources was nearly identical. The CME improves the identification of Medicare Part B enrollment and also allows for more timely release of the MBSF.

The universe of beneficiaries in the CME versus the EDB version of the MBSF are only slightly different.

COMMENT: Some employers offer prescription drug plans to their retirees, and Part D pays a subsidy to plans that offer coverage that is equivalent to (or better than) conventional Part D benefits.

CMS does not collect PDEs for beneficiaries that are enrolled in RDS-eligible plans.

There are 12 monthly variables - where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

**LONG NAME:** BENE_ENROLLMT_REF_YR

**VALUES:** 1999 - current data year

RTI_RACE_CD

LABEL: Research Triangle Institute (RTI) Race Code

DESCRIPTION: Beneficiary race code (modified using RTI algorithm). Enhanced race/ethnicity designation based on first and last name algorithms.

SHORT NAME: RTI_RACE_CD

LONG NAME: RTI_RACE_CD

TYPE: CHAR

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME) (derived)

VALUES: 0 = Unknown
1 = Non-Hispanic White
2 = Black (Or African-American)
3 = Other
4 = Asian/Pacific Islander
5 = Hispanic
6 = American Indian / Alaska Native

COMMENT: This variable is created by taking the beneficiary race code that has historically been used by the Social Security Administration (and is in turn used in CMS’s enrollment database) and applying an algorithm that identifies more beneficiaries as Hispanic or Asian.

This algorithm was developed by the Research Triangle Institute (RTI) and is thus often referred to as the “RTI race code”. The algorithm classifies beneficiaries as Hispanic or Asian if their SSA race code equals 4 (Asian) or 5 (Hispanic), or if they have a first or last name that RTI determined was likely Hispanic or Asian in origin.

The variable also incorporates CCW enhancements that reduce the number of beneficiaries with missing information.
SAMPLE_GROUP

LABEL: Medicare Sample Group Indicator

DESCRIPTION: Medicare 1, 5, or 20% strict sample group indicator.

SHORT NAME: SAMPLE_GROUP

LONG NAME: SAMPLE_GROUP

TYPE: CHAR

LENGTH: 2

SOURCE: CCW (derived)

VALUES: 01, 04, 15, null/missing (not included in 20% sample for the year)

COMMENT: CCW creates the sample values using standard CMS processes to identify the random 1, 5, 15, and 20 percent samples of Medicare beneficiaries.

The sample groups are based on a random 20 percent sample that is split into three mutually exclusive groups of 1 percent, 4 percent, and 15 percent.

To use the 1 percent sample, specify that SAMPLE_GRP equals “01”.
To use the 5 percent sample, specify that SAMPLE_GRP equals “01” or “04”.
To use the 15 percent sample, specify that SAMPLE_GRP equals “15”.
To use the 20 percent sample, specify that SAMPLE_GRP equals “01”, “04”, or “15”.

Beneficiaries are assigned to sample groups each year based on the last two digits of their Medicare Claim Account Numbers (CANs). Since CANs can change over time (e.g., in the case of remarriage), new beneficiaries are becoming eligible for Medicare, and existing beneficiaries are dying, the sample is cross-sectional. There is no guarantee that the exact same beneficiaries are represented in the same sample group from one year to the next (i.e., this is the strict sampling).
