Footnotes:

* Includes all Medicare beneficiaries who were eligible for or enrolled in Medicare on or after January 1, YYYY. Period prevalence is calculated for these rates: beneficiaries with full or nearly full fee-for-service (FFS) coverage during the year who received treatment for the condition within the look back period (all conditions have a 2 year look back period). Please refer to the CCW website for more information, including the algorithms, for these Other Chronic or Disabling Conditions.

† Beneficiaries may be counted in more than one chronic condition category.

‡ Denominator: Includes beneficiaries with full or nearly full FFS coverage (i.e., 11 or 12 months of Medicare Parts A and B [or coverage until time of death] and one month or less of HMO coverage).

▲ Numerator is defined as evidence of treatment for the condition.

NOTE: The application of different Medicare coverage restrictions/criteria will impact the size of these samples.
